FUN BASEL Vol XV Speakers
Launchlabs Basel – 11 Oktober 2018

Priska Burkard   *Winner`s Team of BaselHack 2017

Priska can not sit still, already as a small child she wanted to discover the world, searched for adventures and walked away. She discovered the world with her backpack and experienced a lot professionally. As a trained medical laboratory technician she later worked in the financial industry. Her career led from application development to business analysis to project management and from Zurich to Hong Kong. Today she runs her own company she founded two years ago.

«I don't believe in failure; everything we do is a success in its own way. »

Ixchel Ruiz

Ixchel has been developing software application & tools since 2000. Her research interests include Java, dynamic languages, client-side technologies and testing. She is a Java Champion, Oracle Developer Champion: As a hackergarten enthusiast, Open Source advocate she is also a public speaker, as today, and a mentor.

«Failure is one of the ways the Universe encourages us to quiet down our emotions and thoughts, inviting a mindful introspection to project ourselves toward change.»

Bram Stieltjes

Bram is Vice Chair of Research of the department of Radiology and heads the Comprehensive Digital Diagnostic Department group at the University Hospital Basel. He has a PhD in the field of image analysis from the Leiden University. In 2014 he moved to Basel where he works on hospital-wide data integration and extraction in a clinical context for both research and diagnostic purposes.

«Most things we perceive as failure should be labelled experience, we do not need to valuate most things in neg/pos way. We should promote experience making in another, both privately and for work. »

Sally Solaymantash

Persian born, grown up in UK, she lived in nine countries and has three nationalities. Her passion for learning and software technology has been the key driver of her career. Years of experience from many different industries across the globe lead her to the vision to merge software and business knowledge to create ideal solutions. She wants to challenge the status quo in the industry and is gearing up to turn the technology world on its head, by bringing software out of the shadows and into the limelight with the "Smarter Approach Methodology (SAM)".

«Failure is act of not trying and not learning.»
